LEARN MORE

ABOUT US

Eagle TG offers a comprehensive suite of cybersecurity services, focusing on the implementation of Zero Trust architecture to enhance network security and access control. Our team specializes in certification and accreditation package support, ensuring alignment with rigorous cybersecurity standards and regulations. We prioritize cybersecurity risk management and mitigation, employing advanced data encryption and secure transmission protocols to protect sensitive information. Our approach to security incident management and response is proactive, designed to address threats swiftly and effectively. Furthermore, Eagle TG emphasizes continuous monitoring and vulnerability assessment, enabling real-time detection and resolution of security issues. Our integrated cybersecurity solutions are crafted to safeguard your operations against the dynamic threats of the digital age.

PAST PERFORMANCE

Project: **National Domestic Communications Assistance Center (NDCAC)**
Customer: Federal Bureau of Investigation (FBI)
Date: 09/2023 – 09/2028
Contract Value: $25.02M
Description: Eagle TG provides support on implementing Zero Trust architecture to revolutionize network security and access control. We navigate the complexities of certification and accreditation support, aligning our cybersecurity practices with stringent standards and regulations. Our strategy is comprehensive, involving the meticulous application of data encryption and secure transmission protocols to safeguard sensitive information against unauthorized access and breaches. In managing cybersecurity risks, we employ a dynamic approach to identify, assess, and mitigate potential threats, ensuring the integrity and availability of data. Our response to security incidents is swift and methodical, aimed at minimizing impact and preventing recurrence. Additionally, our commitment to continuous monitoring and vulnerability assessment allows for the early detection and resolution of security issues, maintaining the integrity and confidentiality of data. This approach ensures a resilient and secure operational environment for NDCAC, reflecting our deep expertise in navigating the complex landscape of cybersecurity threats and solutions.

Project: **618 AOC Data and Web Service (DAWS) Hosting Services SAFB**
Customer: USAF Air Mobility Command (AMC)
Date: 09/2017 – 09/2018
Contract Value: $388K
Description: Eagle TG Eagle TG played a pivotal role in the UDOP, an AMC initiative under AMC/A3 that enhances situational awareness for the 618th Air Operations Center, managing NIPRNet/SIPRNet systems across test, production, and COOP environments. Utilizing Red Hat Enterprise Linux and Windows Server 2008, we oversaw network management and provided comprehensive system administration. Our collaboration with UDOP developers led to a secure, sustainable infrastructure aligning with stringent security requirements. We implemented a robust RMF for both NIPRNet and SIPRNet, incorporating NIST 800-53 security controls to ensure compliance and security. Through diligent management of network devices, storage networks, and database servers, Eagle TG ensured operational integrity, confidentiality, and availability, demonstrating our commitment to upholding the highest cybersecurity standards within the DAWS enclave.

EAGLE TECHNOLOGY GROUP

UEI: MBZ8E2DEZTM9 CAGE : 6R8B4

Eagle TG is a tribally owned Small Disadvantaged Business (SDB) that excels in providing information technology and management consulting services. Dedicated to developing, deploying, and maintaining solutions that are secure, reliable, sustainable, and cost-effective, the company boasts a team experienced in supporting diverse programs for both federal agencies and private commercial enterprises, ensuring high quality, efficient services tailored to meet the unique needs of each client.

WHY TRIBAL?

Contracting with a Small Business Administration (SBA) recognized tribally owned SDB offers unique advantages to federal customers. By choosing to do business with us, agencies benefit from flexible and rapid procurement processes due to special federal contracting provisions that enable a more efficient path to high-quality, cost-effective solutions, while also fostering economic growth within historically underserved communities.
